

Geobiology via Mental Power

Presented by

Richard Benishai

Master Geobiologist and Electronic Engineer

Place of the course

Light Heart Retreat (Maine)

2/3/4 September 2011

Entry stones, Light Heart Retreat

The course to be held this September is the first of its type that I shall teach in the USA. It will combine some familiar and some unknown subjects, the total thereof allowing each and every student to continue on a path of harmonization work.

During the *first day*, we shall cover basic and essential information related to the Earth and pathological sources. We shall look into the mental and how to develop its capacities.

During the *second day*, certain methods will be uncovered, exploiting the mental capabilities of each participant: creating vortexes and chimneys, detecting, measuring and correcting a property from the distance.

During the *third day*, the studies will focus on the harmonization of a house and on the ramifications: how to block the negative energy of underground currents, transposing Hartmann and Curry lines into the walls and outside of the house and transposing chimneys outside the property. A house in the area will be chosen as the test case to verify the methods and harmonization procedure taught.

Geobiology is known to many. Some are new in this field and others have spent many years holding a pendulum and practicing dowsing. Today, the greatest concern of a geobiologist should be to improve the environment around him. To do this he needs both tools and knowledge.

This workshop is the sum total of many years of my experience and research work. Some topics in Geobiology deserve more attention, others less, and this according to their importance.

Thus, little time will be spent on the Hartmann and Curry networks, while the emphasis is to be placed on underground currents and chimneys. The methods taught allow for a quick and efficient clearing process.

Day 1 – The basics

How to use the basic tools: pendulum and dowsing rods. For clearing a property, only four graphs are necessary to do all the work. Detecting and blocking underground currents, using the mental.

Chimneys are essential for the etheric clean-up of the planet, but they cause havoc in our homes. How to detect these entities and move them outside.

Detecting and transposing Hartmann and Curry networks, using the mental.

How to improve your mental capacities. Using your intuition in your work, what are your motivations and how to manage stress.

Day 2 – Using the mental

How to analyze and, if necessary, how to make corrections to a property from a distance. The techniques used to discover - remotely - in the house, some evil and negative objects and correct their negativity. The methodology of harmonization of a home, always with logic and discipline. Maximum use of the mind to reduce the time required to clear a property.

Chimneys and vortex are entities to be respected and considered as such. Examples of work done in Israel on high energy sites and application at the level of a house. How to be sure of yourself and trust the results.

Day 3 - Harmonization and increasing the energy

Analysis of a typical house, how to transpose networks in the walls, how to neutralize the

influence of water currents, where and how to create singularities to increase the vibratory rate.

Man and Nature are working closely to increase the vibratory rate of a property. A reminder of this association; who are the members of this team? A rapid and effective method.

Steps taken to harmonize a house: gathering of physical and paranormal indications; identification of visual cues; locating pathogenic problems; recording of energy levels for each room; interpretation of results, and finally correction of problems.

Visit / workshop in a home in the neighborhood. Based on the lessons given, participants will proceed as necessary to increase the energy level of the home.

Remotely working on a plan brought by each student: detection, measurements and corrections.

Terms and Conditions

Each person will be loaned tools for the duration of the course (pendulum and telescopic rods). Bring appropriate clothing for the season and for working outside (a hat may be required).

Schedule: we start each day at 08:30 and complete the session around 18:30

Cost: \$480

A deposit of \$200 is required to insure your participation in the course. Please forward your check to: **Joanna Pinney Buell, POB 2, Sullivan, ME 04664**

Combined 3-day course in Geobiology

DAY 1

Basics in Geobiology

- History of geobiology
- Explanation of graphs
- The pendulum
- Demonstration of graphs
- Blocking currents

Underground currents influence

- Why are currents dangerous?
- Practical application
- Searching for underground currents

Chimneys

- What are chimneys; what they look like; many types; new info and findings
- Transpose chimneys mentally

Electro magnetic networks

- The most 2 important networks
- Demonstration and exercises
- The Earth as an internet

The mental

- The mental
- How to improve your mental capabilities

Ground analysis / Intuition / Life motivations / How to see life / Stress

DAY 2

Mental work

- How to work remotely
- Search techniques
- Measuring energy from far
- Blocking water currents from far
- Transposing H+C from far

Harmonization

- The process (detailed explanations)
- Detecting visual indications
- Pathogenic problem recognition
- Recording energy levels for each room
- Interpreting results
- Problem corrections

Harmonization practice

- Complete review of the process
- Practicing in class

Waves and the Home

- Energy in forms / Principles behind form waves: sharp points and angles, action on the environment.

Polarity in all forms

- Show polarity in different types of objects.

Channeling

- How does it work?

Paranormal experiences

- Wall memories
- Deceased
- Form waves
- Negative objects
- Magic

Practical efforts

- Creating a vortex
- Creating a Cosmo telluric chimney
- Transposing a chimney outside
- De-multiplication of a Hartmann line
- Moving (H+C) networks
- Creating colors of chakras

DAY 3

Harmonizing a property

- Transposing chimneys
- Neutralizing underground currents
- Increase the energy level

Working from far

- Explanations on how to work from far
- How to do it: the technique
- Analysis of your house plan
- Problem correction of your house

Our environment

- Other harmful causes
- Sacred places and their relation with man

General Information

How to get there?

Information on the Light Earth Retreat is given on the site at info@lightheartretreat.com

Lodging

Costs for lodging at the Retreat are treated directly with Joanna Pinney Buell, the owner. The site also includes information on nearby hotels.

Lunches will be provided by a caterer at a reasonable cost. No meat will be served.

We need to know your arrival and departure dates. Indicate if you wish to stay another day to participate in the special course on treatment of people.

Logistics

The tools lent for the duration of the course are:

- A pendulum (super Isis)
- A small pouch with two telescopic antennas

Bring with you:

- Colored pencils
- A compass
- A tape measure
- Two plans of homes (yours and someone else's)

REGISTRATION FORM

This form is to be returned to Richard Benishai via return e-mail

Last name: _____	First: _____
Address: _____	
Code / City: _____	
Telephone: _____	Cellular: _____
E-mail: _____	
Signature: _____	

- I hereby confirm my participation for the 2/3/4 September (two nights).
- I wish to lodge at the Light Heart Retreat.
- I am interested in the one-day special course for therapists.
- I shall arrive the night of the 1st September.
- I shall stay the night of the 4th September.
- I understand that the meals are without meat.

Costs for food and lodging at the Retreat are settled directly with the Retreat in cash or by checks (made out to the Light Heart Retreat).

*** * ***

Payment:

- I am registering for the course at the price of \$480 per person.
- I have already sent the deposit to insure my registration.

*** * ***

Tick off the applicable blocks!
